Release version: 6.31**Release Date:** November 17, 2015

1. Reference Library cascading menu is changed to a tree structure
2. Engine, Transmission and Trim drop downs will be populated based on selection. Example: Transmission will populate after selecting Engine, Trim will populate after selecting Transmission. Currently Engine, Trans and Trim are populated when user selects the vehicle family. This caused invalid combinations.
3. Ok and Cancel buttons in Exchange List are replaced with close button. After selected, parts are added to the Exchange List from the Supersedence window without having to first click on the “OK” button.
4. Fixed issue when using Dual Monitors. Pop up window now display correctly in primary monitor
5. Cascaded Mopar Menus will go away when you click on other areas of the screen. Previous, the user had to select a menu item to close the menus.
6. Enable “Right Click” copy option for selected data on Help Document
7. Thumbnail change - Thumbnails will download only if thumbnail checkbox is enabled or when layout 3 is selected.
8. Parts with zero quantity will now be transferred to the exchange list. User can increase/decrease quantities from the exchange list window.

Release version: 6.4**Release Date:** September 9, 2016

1. White board section showing supersession tree structure matching what is in the legacy StarParts application.
2. User defined setting for maximum number of bookmarks.
3. User selected option (drop down in number of days for 30, 60, 90) to auto delete bookmarks older than selected value.
4. User defined setting for removing leading zero in exchange list (On file transfer).
5. Auto sizing for columns to allow users to see full content of data.
6. Save content in Exchange List for all unlocked tab sessions. Do not delete content in exchanges list when users change vehicle context in unlocked tab session.
