As part of the DaimlerChrysler family, Mopar makes Original Equipment parts and accessories for Chrysler, Dodge and Jeep® vehicles. This means that the same corporate team that designed these vehicles has created the accessories featured in this Data Book — utilizing the original designs and specifications. The result? Mopar Accessories that meet a higher standard than aftermarket accessories. Accessories with not just

THE MOPAR DIFFERENCE

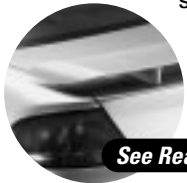

level of detail and thought that creates accessories with a real Mopar Difference. A difference in fit. In engineering. In testing. In materials. In safety standards. Even a difference in the way Mopar Accessories are designed to install on the vehicles.

In short, it's a Mopar Difference, in each one of the accessories featured on these pages, that you'll recognize — and appreciate — for years down the road.

an attention to detail, but a dedication to detail. It's this

Materials Testing
Design Installation
Fit Safety

Mopar **Rear Spoilers** must pass many rigorous tests to ensure that they maintain their good looks and do not adversely affect the performance of the vehicle. Testing under extreme hot and cold temperatures checks the Rear Spoilers' ability to withstand severe conditions without cracking. Weather-resistance tests ensure that the spoiler will maintain its premium finish in any climate. Pull tests help ensure that spoilers won't loosen or vibrate. Several other tests make certain that the weight of the spoiler does not affect normal deck lid operation, or compromise the integrity of the deck lid's hinges, latches and lock. Mopar Rear Spoilers, like all Mopar Accessories, are designed and tested for a seamless integration with DaimlerChrysler vehicles.

See Rear Spoilers for more information

Mopar **Brush Guards and Grille Guards** are designed using advanced engineering software that allows engineers to exactly match the front end of any Dodge truck. However, it's more than a perfect fit. Mopar Deluxe Tubular Brush Guards and Grille Guards feature injection-molded ABS plastic components that ensure sturdy construction and a blemish-free surface.

Tubular Brush and Grille Guards are fashioned from heavy-gauge steel, then formed with an advanced mandrel tube-bending technology for a wrinkle-free appearance. The chroming process then includes more nickel to help prevent rust and finish cloudiness.

Furthermore, because Mopar Brush and Grille Guards are engineered by the same corporate team as Dodge Trucks, they're designed to meet Federal Motor Vehicle Safety Standards for occupant protection as well as Federal Vehicle Lighting Requirements. Aftermarket manufacturers may not be subject to these same standards!

See Brush and Grille Guards for more information

Electronic Accessories from Mopar are designed, and thoroughly tested, to guarantee compatibility with DaimlerChrysler electrical systems. Whether you upgrade your audio system or add a security or navigation system, DaimlerChrysler testing facilities help ensure that negative effects from outside interference — such as commercial radio antennas and microwave towers — are almost non-existent.

Testing also helps ensure that Mopar Electronic Accessories will not interfere with your other electrical or computer systems.

In addition, unlike with some other accessories on the market, Mopar Electronic Accessories also meet DaimlerChrysler standards for current draw, so they won't draw down the vehicle's battery under normal conditions. You can be assured that, even with several Mopar Electronic Accessories, lamps won't dim and engines won't stumble or stall.

See Electronic Accessories for more information

Each Mopar **Running Board**, made to fit Minivans, Jeep® vehicles or Dodge Trucks exactly, is constructed of a sturdy roll-formed steel substructure which passed a 650-pound static weight bench test, a 400-pound dynamic weight test and a 25-pound side-impact test. That means it'll stand up to daily use from heavy loads and minor impacts, and it'll look good for years to come.

The high-impact-resistant plastic cladding that covers Mopar Running Boards also improves durability — and won't shatter, as fiberglass designs might. In addition, the cladding helps guard against chipping, fading and cracking. Even the step surfaces feature a slip-resistant material. Furthermore, paint is not just a close match — it's an exact factory-matched color.

A final Mopar Difference — the available Lighted Running Boards are carefully designed so the light shines down on the stepping surface, not in the driver's or passenger's eyes, as with some other products on the market.

See Premium Running Boards for more information

Mopar **Racks and Carriers** are designed and built to strict Jeep specifications. This more demanding standard is ensured through access to DaimlerChrysler laboratories and testing sites — facilities not available to aftermarket accessory manufacturers.

All Mopar Racks and Carriers are subjected to a series of demanding tests before they are offered. Rack and carrier test tables vigorously shake the products to help ensure durability and stability. Brutal salt-spray testing helps ensure corrosion resistance. A pull test simulates aerodynamic loads that pull against the equipment on the roof rack when driving. Together with high-speed road tests and other proving grounds tests, all these procedures help ensure that racks, carriers and cargo remain securely attached.

In addition, each rack and carrier is custom designed to provide a tight, vibration-free fit — unlike many "universal fit" accessories available — which helps ensure minimal wind noise.

See Racks and Carriers for more information

Mopar **Wheels** feature tough, cast aluminum construction and are specifically designed for an exact fit on Chrysler, Dodge or Jeep vehicles' wheel hubs — unlike "universal fit" wheels, which mount on the wheel studs. This exact fit means wheels that turn true, which translates into less vehicle vibration and a smoother ride.

Every Mopar Wheel is also designed to be used with existing chrome lug nuts and standard wheel weights. In addition, the surface of both painted and polished wheels is glazed with a Clear Coat finish that requires only a normal washing effort — no tedious repolishing on a regular basis to maintain their like-new appearance, as with some other types of wheels.

To help ensure everyone's safety, each Mopar Wheel also undergoes stringent DaimlerChrysler testing, and must pass many other tests — including a simulated curb-impact test — to meet demanding fit, performance and durability standards.

See Wheels for more information

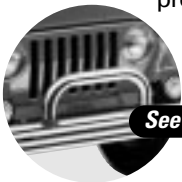

Mopar offers several **Tubular Products** for Dodge Trucks and Jeep vehicles: Front and Rear Bumpers, Grille Guards, Brush Guards, Side Steps and Light Bars. All are designed to blend perfectly with the unique lines of the vehicle, and are available in a variety of finishes.

Mopar tubular products are fashioned from heavy-gauge steel or aluminum, then formed with an advanced mandrel tube-bending technology for a clean, wrinkle-free appearance.

These tubular products are designed to enhance the appearance of Dodge Trucks and Jeep vehicles while resisting road debris and inclement weather conditions without chipping, corroding, pitting or scratching. All mounting hardware meets DaimlerChrysler Materials Standards for corrosion protection.

In addition, because they're designed and engineered by the same corporate team as Dodge Trucks and Jeep vehicles, all Mopar front-end products are evaluated and tested to meet Federal Motor Vehicle Safety Standards for occupant protection as well as Federal Vehicle Lighting Requirements. Aftermarket manufacturers may not be subject to these same standards!

HOW TO READ THIS MOPAR ACCESSORIES DATA BOOK

The **Alphabetical Index** is just what it says — an index of accessories listed alphabetically. You do need to look under the general **name** of the part, not the **type** of part, however. For example, Molded Running Boards are not listed under “M.” Molded is the type of Running Board. They are indexed under “R,” like this: Running Boards, Molded.

The same goes for a Tubular Side Step. It is indexed under “S,” like this: Side Steps, Tubular.

The **Numerical Index** lists accessories by part number from lowest to highest.

In addition, photos, a list of Mopar features, questions to ask about aftermarket competitors and installation information add to the reader-friendly layout.

INSTALLATION TIMES

The installation times listed are average times required to install the accessory, as established by DaimlerChrysler. These installation times are a guide. Actual installation times may vary depending on the technician’s speed, skill level and product knowledge. If it is felt that the published time is not appropriate, submit a “Letter of Information or Suggested Time Schedule Review” as suggested in the back of the Labor Operations Time Schedule book.
