

**2003 WIPER BLADES**

## MOPAR VALUE LINE WIPER BLADES

Mopar Value Line consolidates fast-moving and highly competitive products into a single marketing program so you can take advantage of the lucrative maintenance and light repair business.

The superior quality and durability of Mopar Wiper Blades make Mopar Wiper Blades the clear choice. Discover the Mopar Difference – and increased profits – with Mopar Value Line.

**STEEL FRAME** – An all-steel frame gives the wiper arms added strength for maximum durability. It is heavier than plastic frames to keep the blade from lifting off the glass at highway speeds, and it conforms to the shape of the windshield without taking a set.

**COMPRESSION MOLDED RUBBER** – The compression molded rubber meets or exceeds O.E. standards for firmness, consistency and durability, enabling it to resist compression set, which is the primary cause of chatter.

**PLASTIC BUSHINGS** – The plastic bushings between the joints provide quieter blade action and longer frame life.

**AIR SLOTS** – Specially designed air slots allow wind to pass through the blade at highway speeds, keeping it from lifting off the windshield.

**STAINLESS STEEL SPLIT RAILS** – Durable stainless steel split rails consistently adjust to the contours of the windshield without taking a set.

**EXACT FIT BRACKET** – An exact fit bracket comes factory-installed for easy installation, requiring no assembly and no loose parts.

# HAVE YOU CHECKED YOUR WIPER BLADES?

## Do Your Blades Look Like This?

An improperly functioning wiper blade will not clean the windshield adequately. Replace the blades if any of these conditions occur:

CRACKED RUBBER SPLITS AND/OR SLASHES IN THE RUBBER

WORN, RAGGED EDGES

CONTAMINATED RUBBER ROAD GRIME AND CHEMICAL CAUSING FILM

TORN RUBBER PULLED AWAY FROM BLADE (MAKES A SLAPPING NOISE)

BENT AND/OR CRACKED ARM AND/OR BLADE

RUBBER LOST FLEXIBILITY (CAN'T FLIP OVER)

## Does Your Windshield Look Like This?

A dirty windshield can make it difficult for the driver to see, and may cause a slow reaction time during a hazard. Keep the windshield clean by changing the blades if any of these conditions occur:

OIL-LIKE FILM

MISSED SECTIONS

BLADE LIFTS OFF WINDSHIELD

BEADING AFTER BLADE PASSES

CHATTERING, HOBBLES ACROSS GLASS

A CLEAN WINDSHIELD AND PROPERLY WORKING WIPER BLADES ARE IMPORTANT SAFETY ITEMS FOR ALL DRIVERS. BY ANALYZING BLADES AND WINDSHIELD VISIBILITY, YOU CAN DETERMINE IF THE WIPER BLADES NEED TO BE REPLACED. CHECK WIPER BLADES REGULARLY. REPLACEMENT OF WIPER BLADES IS RECOMMENDED EVERY SIX MONTHS.
